

Schools & Universities

BPJ bpj.com/focus-areas/schools-universities/

BPJ Offers the Educated Approach to Insurance.

Knowledge is power, and that's especially true when you know you're protected. As an independent agency, BPJ will find the right insurance solutions for your school or university by comparing rates from a substantial network of carriers and consortiums. We will review your coverage options and tailor a package that specifically addresses and protects against those issues faced in education. Whether you're a K-12 school, private or charter school, or a college or university, we will determine the best coverage options available, then help you decide what makes the most sense for you.

Options Offered by BPJ Include:

Property Coverage

Education properties have specialized coverage to protect them from the standard items as well as ones that are specific to education facilities. These include staff property, students' personal items, classroom items, laboratory animals, fine arts, key systems/security, etc.

Liability Coverage

Protection from legal liability of your school/university on an occurrence basis in an event people are injured or damage to one's property has occurred. It can include employee benefits liability, sexual misconduct liability, employment practices, cyber risk, situations involving libel and slander, and liability for nurses, athletic coaches/trainers, science lab incidents, and crisis occurred during school-sponsored events.

Employee Benefits

We understand that schools are not "one size fits all" when it comes to employee benefits. At BPJ we represent multiple school health insurance consortiums and also offer stand-alone fully insured plans and self-funded plans. Your school is unique and your benefits package needs to meet the needs of your employees. We take great pride in providing transparent consulting that leaves our school and university partners feeling confident in the benefit package they offer their employees.
